SKM SAGLAM Refrigeration Components has been rendering service since 1985 in pressure vessels for refrigeration systems, thermoplastic capillary hoses and fittings, refrigerant distributor, fittings and refrigeration manometers.

ABOUT US

We keep the satisfaction of our customers at the highest level by producing our products, which are manufactured with our state-of-the-art machinery, at the highest quality and delivering them on time.

We obtained CE certification document so that the parts produced in our company are produced in accordance with World Quality standards and we submit our products to Europe and all World countries.

Our Company is managed with ISO 9001-2015 quality management system, it is a Turkish company which meets all the demands of our customers, does not compromise on Quality,leader in its sector, pays great attention to honesty and after-sale service, plans the time well in parallel with demand and expectations of the customers and which is always developed by providig a fast production flow system and renews itself.

PROFESSIONAL PRODUCTION

SKM SAGLAM capillary hoses and fittings can be used with HFO, HCFC, HFC and most importantly CO^2 systems up to 120 bar/1740 psi from -45°C / -49°F to +266 °F

SKMSAGLAM | Professional Production
REFRIGERATION COMPONENTS

Class 1

Low Permeability

SKM SAGLAM brand capillary hoses are in CLASS 1 category in permeability classification according to European Standard EN 1736:2008

1- INNER TUBE MATERIAL

Thermoplastic polymer.

2-REINFORCING MATERIAL

Polyester braid of high tensile strength with high modulus.

3- COVER MATERIAL (BLACK - ORANGE- GREEN)

Thermoplastic polymer.
